

Data Intake Report

Name: G2M Insight for Cab Investment Firm

Report date: 8/14/2022

Internship Batch : LISUM 12

Version:<1.0>

Data intake by: Nuri Tas

Data intake reviewer:<intern who reviewed the report>

Data storage location: nbviewer.org --- <https://nbviewer.org/github/Nuri-Tas/Data-Analysis/blob/main/Internship/Cab%20EDA%20%281%29.ipynb>

Tabular data details:

Total number of observations	359392
Total number of files	5
Total number of features	15 (1 extra feature from NYC weather dataset)
Base format of the file	csv
Size of the data	32 MB

Note: Replicate same table with file name if you have more than one file.

Proposed Approach:

- Transaction ID dataset contains more Transaction IDs than cab data, so the extra ID's are cut from Transaction ID
- Profit of rides are calculated by taking the difference between Price_Charged and Cost_of_Trip
